

Supply of artwork Textissues

In order to prepare the artwork for the selected product we have a digital drawing of the cutter guide / working drawing of every product available. This drawing of the cutter guide in EPS format clearly indicates measurements of the selected product. Based on this information you can prepare and position the artwork (we kindly request you not to change the name and colour of the cutter-guide).

Our graphics department uses the following software programs:

Indesign CS4

Quark X-Press 7.0

Adobe Illustrator CS4

Adobe Photoshop CS4

Older versions of the above programs are also available.

We prefer to receive a ready-to-print PDF in which our cutter guide is positioned according to the cutter guide drawing received. Please pay attention to the following points when supplying us with a ready-to-print PDF:

- The artwork should be designed with "bleed" in order to avoid white borders during cutting of the board. This means that the coloured surfaces must extend over the cut-out markings (see example in the drawing of the cutter guide).
- All elements of the artwork have to be prepared either in CMYK colours (Cyan, magenta, yellow and black). Do not use RGB, PMS or HKS!
- Place the texts in contours / outlines.
- Draw up all black texts and surfaces in 100% black and set the black to 'overprint'.
- Move the guide to the spot colour called 'stans' as stated in the document received. The other colours must be composed in CMYK.
- If there is some doubt if the artwork is reproducible, may we recommend to contact our design department. Check the artwork carefully before despatch!

Your digital documents can be supplied on CD-ROM or DVD, or by e-mail. Data transfer can also be done via an FTP server.

After receipt of the digital material our graphic department checks the artwork on the above things.

Follow-up procedure

We shall prepare a ready-to-print pdf. If production may proceed after approval of the pdf, you will receive the order confirmation only after we have been informed by you about acceptance of the pdf. One copy of the order confirmation has to be returned to us duly signed. When all conditions have been met we shall commence with production immediately.
